

RMCARD301 Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or SNMP management application.

The CyberPower RMCARD301 is a full-featured network UPS management device that remotely manages, monitors, and controls your CyberPower UPS products.

This internal remote management card allows for monitoring and control of a UPS via Web Browser or NMS. By utilizing the auto-shutdown software, servers and workstations stay protected from data loss due to power failure. Event log in software traces history of the UPS operational history. Security management is also provided.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material and workmanship.

Features

- Real time UPS monitoring for Smart App Online Units
- Remote Management and Configuration of UPS (HTTP) via Web Browser or NMS
- Automatic Events Notification via SNMP Trap
- 10Mbps Ethernet Compatible
- Event & Data Logging
- Supports TCP/IP, UDP, SNMP, and HTTP protocols
- Security Management Provided

RMCARD301 Remote Management Card

Remotely manage, monitor and control your UPS from a web browser or SNMP management application.
